03 OCT 2023

Message

India is endowed with the largest livestock population in the world comprised of 537 million livestock. Being the largest Milk producer in the world, India has immense resources of Livestock which forms an important segment of the economy livelihood and a steady source of nutrition. Over the period, the contribution of Livestock Sector in the Agriculture Sector has been showing steady improvement that signifies its growing importance in the Indian economy.

The State Governments are also considered as indispensable part of the whole system in achieving the progress towards this Sector. I am happy to share that the Department of Animal Husbandry and Dairying takes painstaking efforts in compiling and publishing this report. "**Basic Animal Husbandry Statistics 2023**" records the current production estimates and many more statistics that are useful for all stakeholders for planning and policy making purposes as well as for research and academician across the globe. This publication would not have been possible without the active participation of all States/UTs. I hope that the information published in this publication will help to untap the potentiality of Livestock Sector to accomplish the goals of "Atmanirbhar Bharat".

I sincerely congratulate the officials of Department of Animal Husbandry and Dairying for bringing out this Annual Publication on a regular basis.

MESSAGE

The livestock production plays an integral part of rural economy welling of farmers. It provides food, income, employment and many other contributions to rural development. Animal products such as milk, egg, meat provide much required nutrition and daily cash income. This sector also plays an important role in the national economy and socio-economic development of the country.

The Statistics tools are the important fact-finding machines by which the growth of the sector is presented in a systematic manner. Statistics itself holds great importance for framing policies and programmes of all sectors including Livestock. The Collection of Animal Husbandry Statistics has been undertaken since past in participation with all States/UTs. It is governed by a systematic approach through continuous support from State/UTs and monitoring by the Department of Animal Husbandry & Dairying.

I am pleased to share the publication titled "**Basic Animal Husbandry Statistics -2023**" with all the stakeholders as it gives an overview of Animal Husbandry sector briefly in terms of statistics. This publication is a compilation of the all-relevant statistics of livestock sector that contains up-to-date information on livestock production, livestock population and other information like livestock diseases, infrastructure, etc.

I wish this publication will help the readers in getting a detailed overview and the necessary insights. I commend the efforts of the officials of Department of Animal Husbandry & Dairying for bringing out this valuable statistics literature.

MESSAGE

Livestock rearing is one of the most important economic activities in the rural areas of the country contributing significantly to the national economy. This sector is contributing to the economy in a big way considering the higher rate of growth of the sector in comparison to the general agricultural sector. Presently, the GVA of the Livestock Sector has recorded an annual growth rate of around 6.00% at constant prices. Its contribution to the Indian Agriculture and Indian Economy is increasing steadily with a share of 30.47% in Agriculture & Allied Sector's GVA and 4.75% in the country's total GVA, respectively. The Basic Animal Husbandry Statistics contain tabulated data sets giving production estimates for Major Livestock Products like Milk, Egg, Meat and Wool. It also provides livestock population of different species, by age, sex and uses, etc. It would be useful to all stakeholders such as ministries of Govt. of India, policy planners, veterinarians, scientists, industry and various research organizations, Govt. agencies and others involved in the development of the Livestock Sector. I appreciate the contribution of all the States/ UT's in providing crucial data that helped in the finalization of this report. I also acknowledge the efforts of the officers of Animal Husbandry Statistics Division, DAHD in bringing out this publication that encapsulates Livestock Production Statistics of 2022-23.

PREFACE

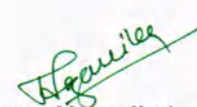

Basic Animal Husbandry Statistics (BAHS) provide information on Major Livestock Products (MLP) namely Milk, Egg, Meat and Wool. MLP information are collected through the States/UTs under the guidance of Department of Animal Husbandry & Dairying, Government of India through the CSS scheme called Integrated Sample Survey (ISS) annually. BAHS-2023 is the 24th in the series and contains detailed tabulated data of production estimates of MLP for the period 1st March 2022 to 28th February 2023.

Livestock rearing is one of the most important activities in rural India provide supplementary income to the families' dependent on Agricultural based activities. This Sector contributes about 30.47% of the total Agriculture GVA. Information published in the present volume provides major input to study the rural economy & contribution from the livestock sector.

The publication contains salient features of production estimates, Gross Value Added, Gross input/output and other technical aspect of Integrated Sample Survey besides the graphical presentation of data. It also contains brief on livestock and breeds as per 20th Livestock Census, Veterinary units in India, the GDP/GVA of Livestock Sector and other related Animal Husbandry Statistics.

Collection and compilation of a voluminous data to develop this document is a great task & has involved sincere and dedicated efforts of all States/UTs and Central Government's Officers/Officials. Their efforts are highly appreciated and acknowledged. I also wish to place my appreciations to Shri V.P. Singh, Director, Ms. Shraddha Pal & Shri Bunti Kumar, Assistant Director, Shri Sunil Kumar, SSO, Shri Jitender Kumar, Shri Hardeep, Shri Atul Kumar & Ms. Priyanka Kumari, EAs and Shri Vijay Karayat, OA for compilation & examining the accuracy of the data and its timeliness.

It is hoped that the publication would be useful to the administrators, planners, veterinarians and various research institutes. The data is also being used by various other Ministries, NGO's for administrative and analytical purpose. Suggestions for improvement the publication are most welcome.

INTRODUCTION

INTRODUCTION

01

1.1 OVERVIEW

The Animal Husbandry Statistics (AHS) Division of Department of Animal Husbandry & Dairying (DAHD) is entrusted with the generation of Animal Husbandry Statistics through the schemes Livestock Census and Integrated Sample Survey. The Livestock Census (LC) is a quinquennial Census conducted across the country in participation with all the States and Union Territories. This is the basic source of data for the number of livestock and poultry held by the households in the country. The another important aspect is livestock production which is estimated annually based on the outcomes of Integrated Sample Survey (ISS). The survey is conducted in participation with States and Union Territories following a specified time line and methodology. The Survey methodology of Integrated Sample Survey is designed by ICAR-Indian Agricultural Statistics Research Institute (ICAR-IASRI).

Integrated Sample Survey is the only scheme through which considerable data, particularly on the production estimate of Major Livestock Products (MLPs) viz. Milk, Egg, Meat and Wool, is being generated for policy formulation in the livestock sector. Information on number

of veterinary hospitals, polyclinic, goshalas, State farms and other infrastructure, number of Artificial Insemination performed and other animal husbandry statistics is also compiled through annual returns.

The present publication of Basic Animal Husbandry Statistics-2023 is framed based mainly on the outcomes of the Integrated Samples Survey for the period 1st March 2022 to 28th February, 2023. It has two Chapters with Chapter One: Introduction including brief discussions on objective of survey, survey methodology, reference period, sampling design, analysis of data of milk, egg, meat and wool. Chapter Two contains summary of MLP data on annual production, growth rate, per capita availability, average yield per animal, state-wise & species-wise share etc. The report also contains tables of State-wise data of estimated production of milk, egg, meat and wool. Not only the total production statistics, the book also gives a picture on the estimated number of animals in milk production, estimated poultry egg laying birds, estimated number of animals slaughtered etc. Besides livestock production statistics it is also important to have included related statistics of Livestock population, such as GVA of livestock, export import data etc. so as to facilitate a ready

reference of all such vital information. Moreover, the data of infrastructure such as number of veterinary hospitals, polyclinic, goshalas etc. have also been included in this report.

The results of the survey will be of use to the National Accounts Division, Department of Fisheries, Department of Agriculture, Cooperation & Farmers Welfare, Department of Animal Husbandry of States/UT governments, private agencies and research institutions etc. for effective policy, decisions making and researches.

1.2 OBJECTIVE OF THE SURVEY

The primary objective of ISS is to produce animal wise all India as well as state/UT level

estimates of 4 major livestock products like milk, egg, meat and wool. It fulfills the need of timely availability of reliable and current data relating to various livestock indicators which will further help in evolving, monitoring and evaluating various developmental schemes in this sector. It also contributes to stock of time series data on production of milk, meat, egg and wool which may be used in research and policy making.

1.3 REFERENCE PERIOD

The Survey is conducted from March to February. The entire period of one year is divided into three Seasons of 4 months. These Seasons are:

Name of the Season	Period of survey
Summer Season	1st March to 30th June (122 days)
Rainy Season	1st July to 31st October (123 days)
Winter Season	1st November to 28th or 29th February (120 days or 121 days in a leap year)

1.4 COVERAGE OF THE SURVEY

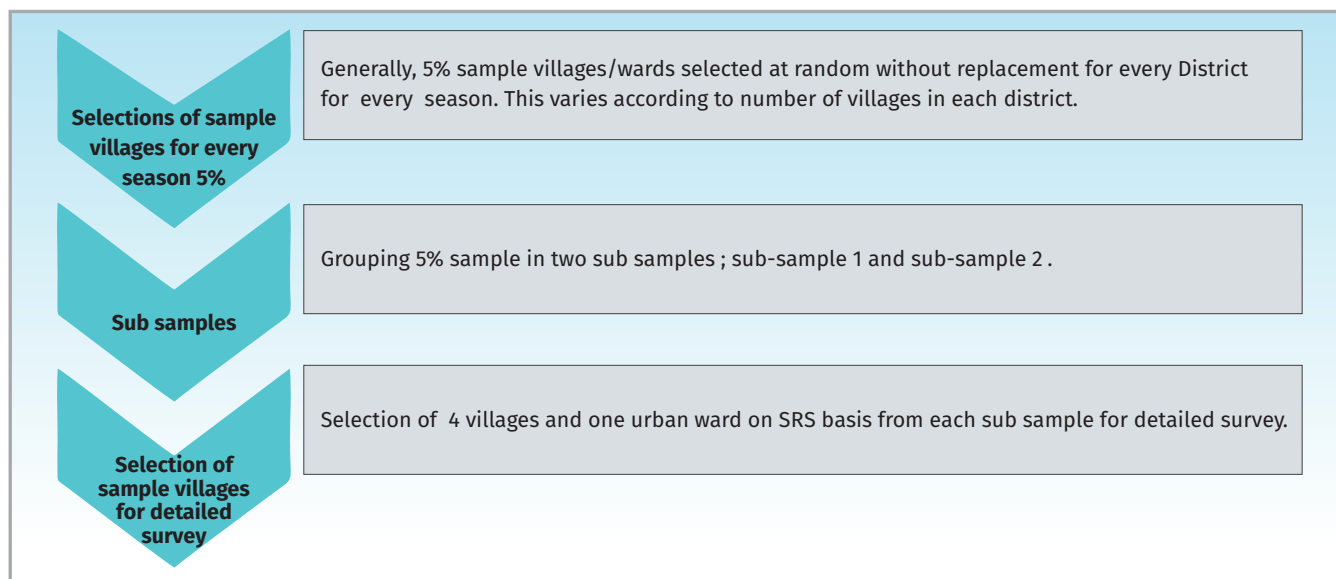

The Survey is conducted in the entire rural/ urban areas of States/UTs. As a general principle, the survey is targeted to cover around 5% village in every season taking into account a total 15% villages, nearly 96,000 villages in a year. Since the year 2015-16, the survey covered urban areas too wherein 2 urban wards of each districts are selected at random for estimation of production of major livestock products.

1.5 SAMPLING DESIGN

The sampling design is a stratified three stage design with district as stratum. The first stage units are villages or urban wards, second stage units are households and third and ultimate stage units are animals. The list of villages as per the latest Livestock Census constitutes the sampling frame. As mentioned under 1.2, the survey is conducted across the country in three seasons and based on the seasonal estimates, the annual estimates are

derived. The State Department of Animal Husbandry is the nodal agency for implementation of the sample survey. The survey is conducted in two stages, (i) Complete Enumeration and (ii) Detailed Survey. The estimated livestock population is

arrived based on complete enumeration and the average yield is calculated based on detailed survey. An outline of the sampling design is described in the following diagram.

For complete enumeration, a general principle of 5% villages/urban wards are selected for each district in a season covering a total of 15% of samples per annum using Simple Random Sampling without Replacement (SRSWOR) in a year. However, this is a general principle and varies according to the size of the district and availability of staff. The 5% villages/urban wards are further grouped into two sub-samples and the production estimates are derived for the two sub-samples separately. This is done for measuring the standard error. For detailed survey, a sample of 4 villages and 1 urban ward are selected from each sub-sample for the estimation of yield rate for rural and urban area separately. The sample villages and wards are selected by the States/UTs at the beginning of every survey period annually.

Since survey is conducted on seasonal basis, each season in a year is divided into 4 rounds (4 months).

At the first month of every season the enumerators visit the households in the selected village to list all livestock including poultry available in each household. This is a listing process based on which the total in-milk animals are estimated in case of milk production and total estimated layers in case of egg production, total number of animals/birds slaughtered in case of meat production and number of sheep shorn in case of wool production. For meat production, slaughter houses, poultry farms and butcher shops are also taken into consideration for estimating the number of animals/birds slaughtered. For capturing all these information eight schedules have been designed under the Integrated Sample Survey as mentioned briefly below:

- ❖ **SCHEDULE-I** - General Information General information about the villages selected for complete enumeration and particulars

of those villages in addition to breed, sex, age wise livestock population as per latest Livestock Census will be collected here.

- ❖ **SCHEDULE-II** - Complete Enumeration: Listing of household/household enterprises/non-household enterprises/institution in the village/ward will be done here. The information on Milch animals and Poultry in the sample and number of Animals Slaughtered during last 4 months will also be recorded in this schedule.
- ❖ **SCHEDULE-III** - Details of milk yield in selected households: For detail study, one cluster of two households/enterprises each will be selected from each of six categories of cattle and buffalo for collection of data on milk yield. If none of the households selected for detailed study possess goat in milk, then 2 more households/enterprises having goats in milk should be selected. Beside the milk data, the information on utilization of total milk and dung from cattle, buffalo and goat will also be canvassed in this schedule.
- ❖ **SCHEDULE-IV** - Details of egg production in selected households: Selection of two clusters of 5 households/enterprises having layer birds (Fowl & Duck) for collection of yield rate for Desi and Improved Fowl & Duck will be done here along with collection of data on consumption and utilization pattern of Production of eggs etc.
- ❖ **SCHEDULE-V** - Details of Egg production in the commercial poultry farms: Collection of data through administrative returns from all layer farms.

- ❖ **SCHEDULE-VI** - Details of wool production in sample households: By filing this schedule wool production data will be collected from a sample of 8 households.
- ❖ **SCHEDULE-VII** - Information on yield of meat from recognized slaughterhouses
- ❖ **SCHEDULE-VIII** - Details of Broilers and Layers' Meat production in the commercial poultry farms: Schedules VII and VIII are related to meat production. So far as meat production is concerned, information number of animals slaughtered will be collected from all recognised slaughter houses in the districts and from all households and butcher shops in all the sample of villages/wards selected for complete enumeration.

Technical Committee of Direction for improvement of Animal Husbandry Statistics (TCD)

The scheme Integrated Sample Survey (ISS) is evaluated every year by the Technical Committee of Direction for improvement of Animal Husbandry Statistics. The Committee meets once in every year to evaluate the progress of the scheme. The recommendations of the committee are implemented by all States/UTs Animal Husbandry Department and Action taken report is submitted to the TCD in its subsequent meeting. Last TCD meeting was held at Bengaluru, Karnataka during the period 29th -30th September ,2022. In the similar line, Technical Monitoring Committee (TMC) is in place in every State/UTs to provide technical advice on survey methodology and its implementation.

SUMMARY OF ANIMAL HUSBANDRY STATISTICS-2023

02

MAJOR HIGHLIGHTS OF MILK PRODUCTION

- ❖ Total milk production in the country is 230.58 million tonnes during 2022-23.
- ❖ India ranks 1st in the world in terms of total milk production. (Source: FAO).
- ❖ The milk production has increased by 3.83% over the previous year (2021-22).
- ❖ The per-capita availability of milk is 459 grams per day.
- ❖ The average yield per animal per day for exotic/crossbred is 8.55 Kg/day/Animal and for indigenous/non-descript is 3.44 Kg/day/Animal.
- ❖ The milk production from exotic/crossbred cattle has increased by 3.75% and indigenous/non-descript cattle has increased by 2.63% as compared to previous year. The milk production from buffaloes also increased by 3.69% as compared to previous year.
- ❖ Top 5 Milk producing States are: Uttar Pradesh (15.72%), Rajasthan (14.44%), Madhya Pradesh (8.73%), Gujarat (7.49%), Andhra Pradesh (6.70%). They together contribute 53.08% of total Milk production in the country.

2.1 Milk Production

*Based on Projected Human Population according to Population Census-2011

A trend showing the increase in milk production over the past few years is depicted in the **Graph 2.1**. The graph shows there is a consistent increase in the production of milk over the years. The milk production has increased from 222.07 million tonnes in 2021-22 to 230.58 million tonnes

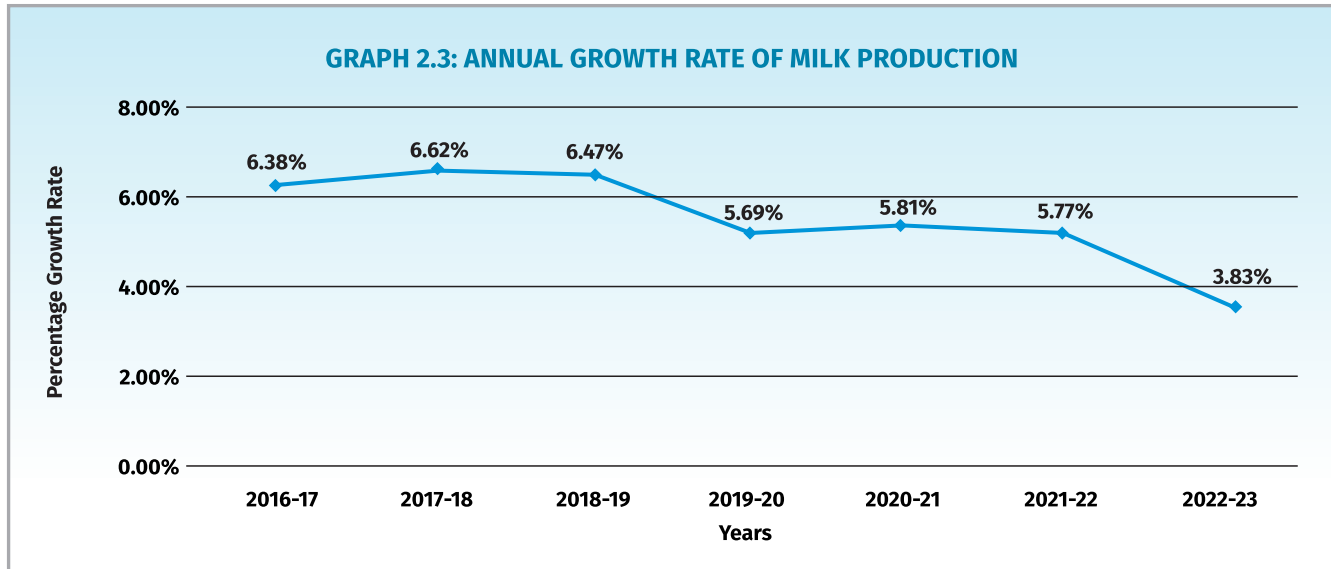

in 2022-23 registering a growth of 3.83%. There has been steady increase in per capita availability of milk since 2016-17. The per capita availability has increased from 351 gm/ day in 2016-17 to 459 gm / day in 2022-23 as illustrated in the **Graph 2.1**.

2.1.1 SPECIES-WISE MILK CONTRIBUTION

The **Graph 2.2** shows the contribution of milk production by Cattle, Buffalo and Goat. The analysis shows nearly 31.94% of the total milk production is contributed by Indigenous Buffaloes followed by 29.81% by crossbred cattle. The Indigenous cattle contribute 10.73% of the total milk production in the country whereas non-descript cattle contribute 9.51% and non-descript buffaloes contribute 12.87% of the total milk production in the country. Goat milk shares a contribution of 3.30% in the total milk production across the country. Exotic cow has share (1.86%) to the total milk production.

2.1.2 ANNUAL GROWTH RATE OF MILK PRODUCTION

Graph 2.3 indicates the annual growth rate of milk production since the year 2016-17 to 2022-23. In the current year 2022-23, the milk production has registered an annual growth of 3.83%. The consistent growth in the total milk production of the country accounts is on account of the various initiatives taken by the Government to increase the milk production to support the increasing Human population.

2.1.3 AVERAGE YIELD RATE OF CATTLE

Graph 2.4 shows that the milk yield of Exotic/Crossbred cows reported 8.55 Kgs per cow per day during 2022-23 and Indigenous/Non-descript cows reported yield of 3.44 Kgs per cow per day during the year 2022-23.

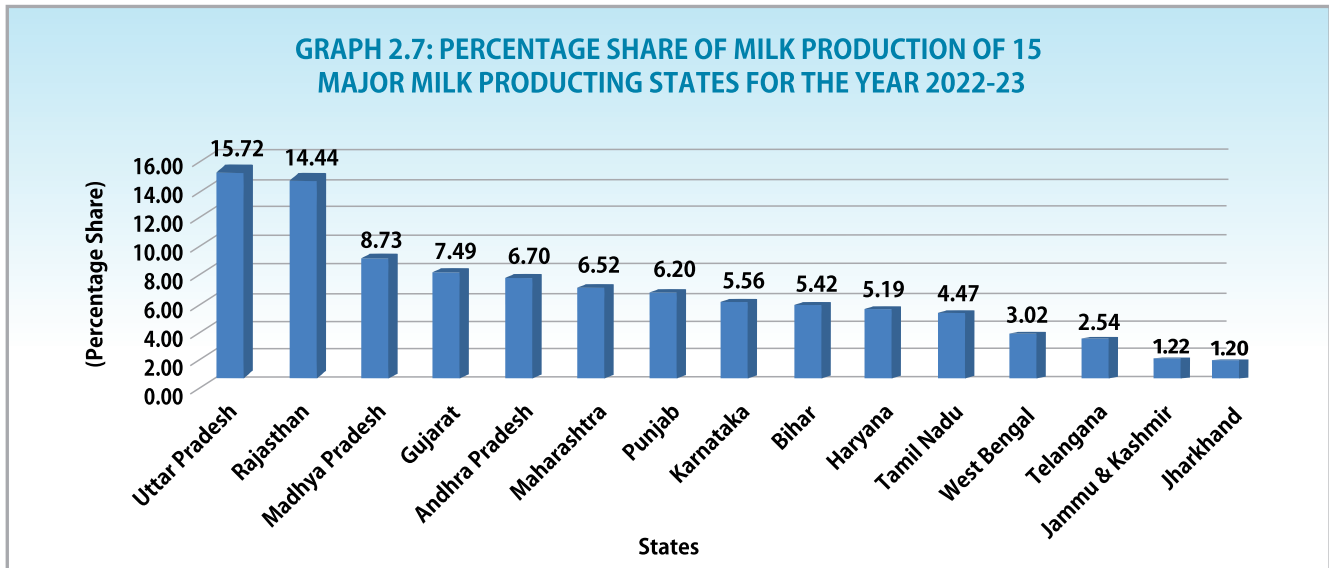

The yield rate was showing a progressive trend during the year 2022-23. The State-wise variation in the yield rate of Cattle in leading milk producing States is depicted in **Graph 2.5**.

2.1.4 STATE-WISE ANNUAL GROWTH OF MILK PRODUCTION DURING 2022-23

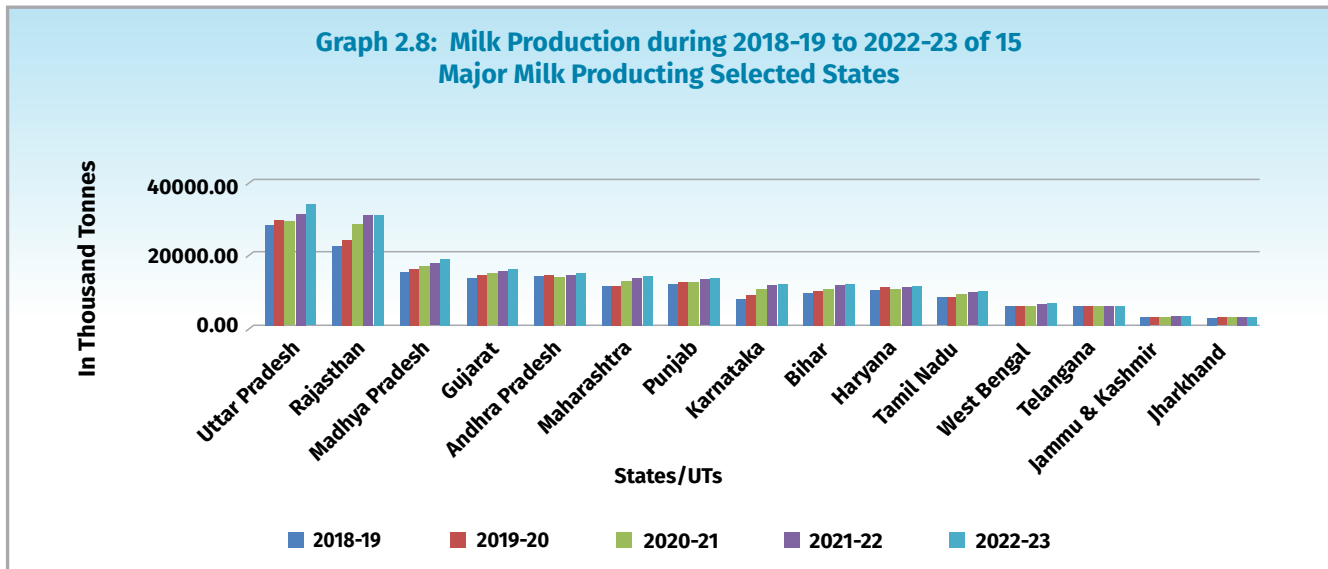

State-wise analysis in the growth pattern of milk production during 2022-23 over the last year is depicted in **Graph 2.6**. It is observed that 4 States have registered growth of more than 6.00% in the milk production. Amongst them 8 States namely Karnataka, West Bengal, Uttar Pradesh, Tripura, Madhya Pradesh, Chhattisgarh, Jharkhand and Maharashtra have crossed the national average growth rate of milk production i.e. 3.83%.

2.1.5 STATE-WISE SHARE OF MILK PRODUCTION DURING 2022-23

The State-wise share of milk production vis-a-vis total milk production in the country is given in the **Graph 2.7**. The largest producer of milk is Uttar Pradesh with 15.72% of the total milk production in the country followed by Rajasthan that produces 14.44% of the total milk production. Madhya

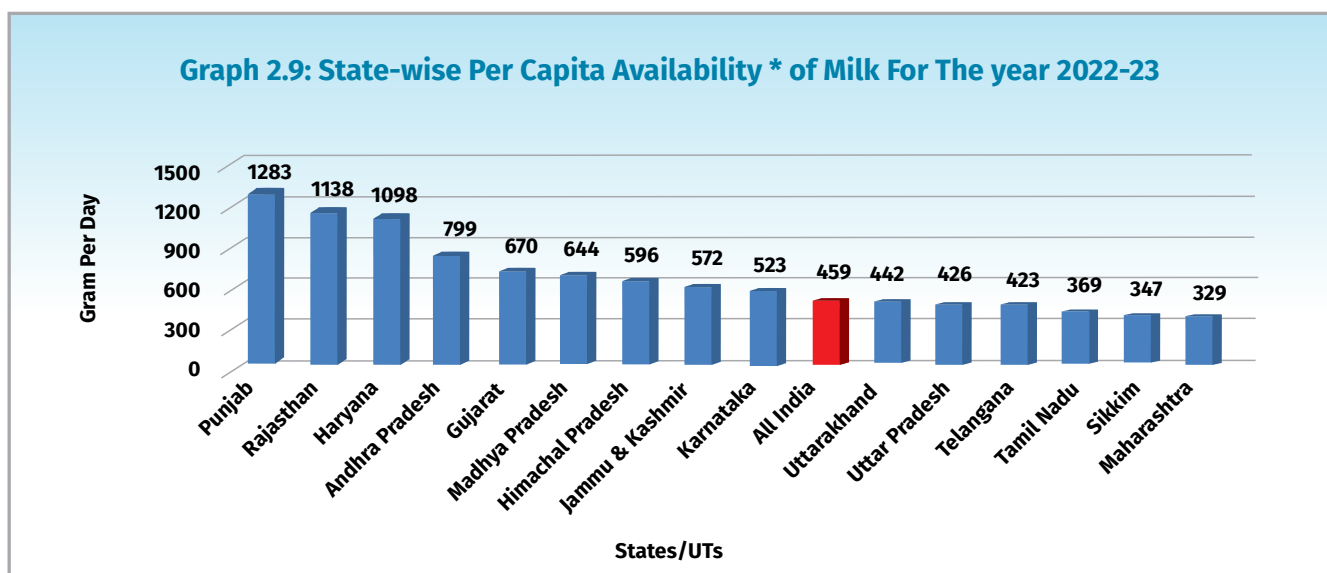

Pradesh, Gujarat and Andhra Pradesh stand as the third, fourth and fifth largest milk producing states that produce 8.73%, 7.49% and 6.70% of the total milk produced in the country respectively.

The **Graph 2.8** shows State-wise variation in total milk production since 2018-19 to 2022-23. It is observed that states like Uttar Pradesh, Rajasthan, Madhya Pradesh, Gujarat, Andhra Pradesh, Maharashtra, Punjab, Karnataka, Bihar, Haryana, Tamil Nadu, West Bengal, Telangana, Jammu & Kashmir and Jharkhand had a progressive trend in the production of milk while Uttar Pradesh remained the largest producer of milk during the entire period.

2.1.6 PER CAPITA AVAILABILITY OF MILK DURING 2022-23

The **Graph 2.9** below shows the per-capita availability of milk during 2022-23 in various States/UTs including the All-India average.

*Based on Projected Population according to Population Census-2011

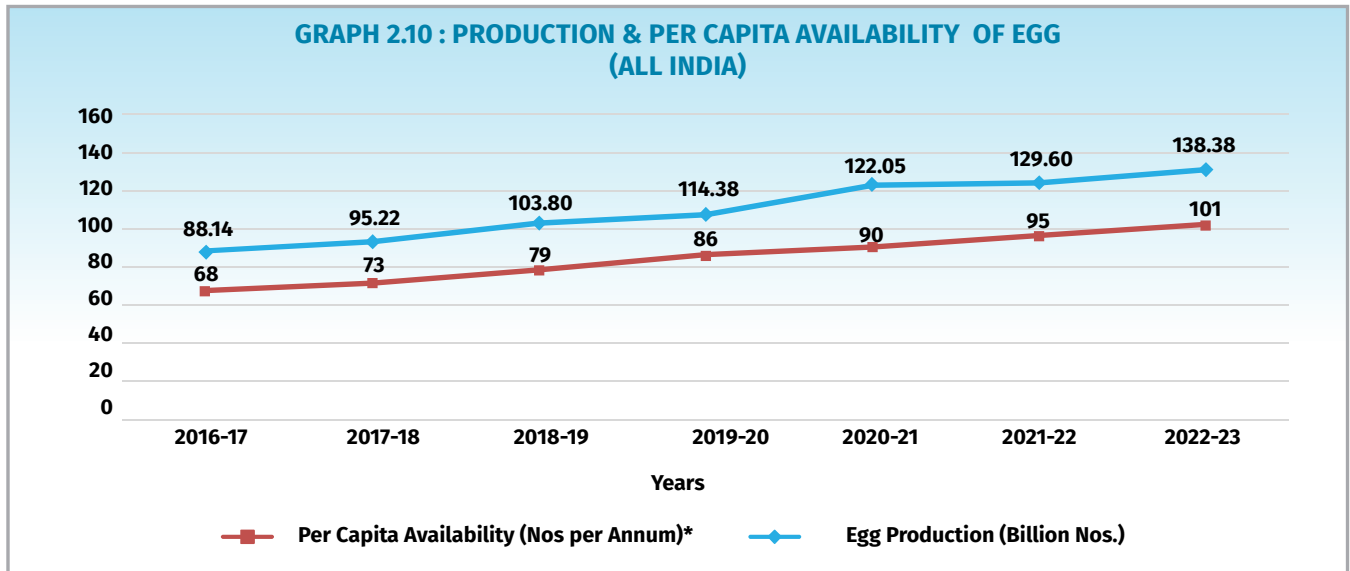

The graph shows that 9 States are having per-capita availability more than the national average with highest per-capita availability in Punjab. It is observed that the success of the initiatives taken to increase the milk production in view of increasing population is highlighted with the constant increase in the per capita availability of milk across the country.

MAJOR HIGHLIGHTS OF EGG PRODUCTION

- ❖ The total egg production in the country is 138.38 billion numbers during 2022-23.
- ❖ India ranks 3rd in the world in terms of total Egg production (Source: FAO).
- ❖ The egg production has increased by 6.77% as compared to previous year (2021-22).
- ❖ The per-capita availability of egg is 101 eggs per annum.
- ❖ Top 5 egg producing States are Andhra Pradesh (20.13%), Tamil Nadu (15.58%), Telangana (12.77%), West Bengal (9.93%) and Karnataka (6.51%) They together contribute 64.93% of total egg production in the country.
- ❖ The total egg production from commercial poultry is 118.16 billion numbers and backyard poultry are 20.20 billion numbers contributing 85.40% and 14.60% of total production of egg respectively.

2.2 Egg Production

*Based on Projected Human Population according to Population Census-2011

The **Graph 2.10** shows that the total egg production in the country was at 88.14 Billion Nos. in the year 2016-17 and since then the production of egg continues to rise over the period. It can be observed in the graph that the Egg production has improved substantially and it reached 138.38 billion numbers. in the year 2022-23. The per

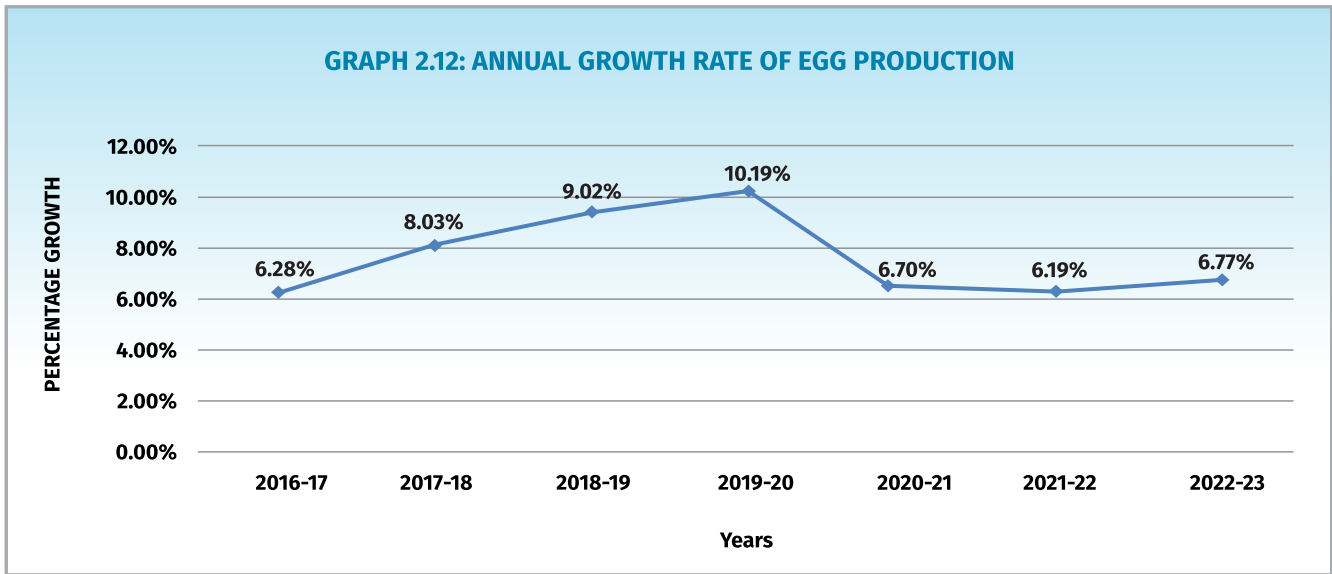

capita availability was 68 eggs per annum during the period 2016-17. There has been steady increase in per capita availability of egg. The per capita availability reached at 101 eggs per annum in the year 2022-23, a Six-point jump from 95 eggs per annum of the previous year 2021-22.

2.2.1 SPECIES-WISE EGG CONTRIBUTION

The **Graph 2.11** showing the contribution of egg production by Fowl and Duck. The graph shows Improved Fowl contribute 88.41% of the production of egg and 10.73% is from Desi Fowls with respect to total production of egg. The Desi Duck and Improved Duck contribute 0.74% and 0.12% respectively with respect to total egg production.

2.2.2 ANNUAL GROWTH RATE OF EGG PRODUCTION SINCE THE YEAR 2016-17 TO 2022-23

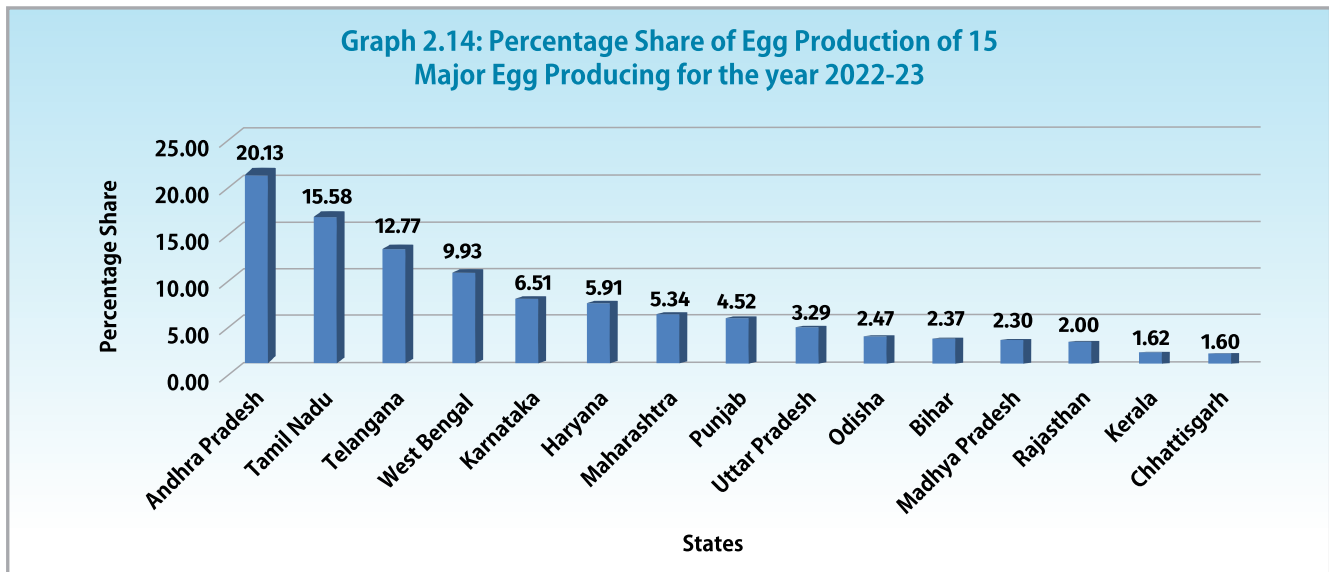

The **Graph 2.12** shows the annual growth rate of egg production since the period 2016-17 to 2022-23 is registered as 6.77%. The Annual Growth Rate for the year 2022-23.

2.2.3 STATE-WISE ANNUAL GROWTH OF EGG PRODUCTION DURING 2022-23

State-wise analysis in the growth pattern of egg production during 2022-23 is depicted in **Graph 2.13**. Eight States have crossed the national growth rate 6.77%, Significant growth in the egg production is seen in the case of West Bengal, Sikkim, Uttar Pradesh, Odisha, Madhya Pradesh, Karnataka, Chhattisgarh and Bihar. It is also observed that 9 States have registered growth 6.00% & above during 2022-23 in case of Egg production.

2.2.4 STATE-WISE SHARE OF EGG PRODUCTION DURING 2022-23

The above **Graph 2.14** showing the state-wise share of egg production during 2022-23. The largest producer of egg is Andhra Pradesh which produces 20.13% of the total egg production in the country followed by Tamil Nadu that produces 15.58% of the total egg production. Telangana is the third largest egg producing state in the country with a share of 12.77% of the total egg production in the country. Some other States that contribute more than 5.00% of the total eggs produced across the country are West Bengal, Karnataka, Haryana and Maharashtra.

State-wise analysis as depicted in **Graph 2.15** below shows that, during the period 2016-17 to 2022-23, there is a steady increase in the production of egg in all States.

2.2.5 STATE-WISE PER CAPITA AVAILABILITY OF EGG

The **Graph 2.16** below shows the per-capita availability of egg during 2022-23 in various States/UTs including the All-India average. The graph shows that 9 States are having per-capita availability more than the national average.

*Based on Projected Human Population according to Population Census-2011

MAJOR HIGHLIGHTS OF MEAT PRODUCTION

- ❖ The total meat production in the country is 9.77 million tonnes during 2022-23.
- ❖ India ranks 8th in the world in terms of total Meat production (Source: FAO).
- ❖ The meat production has increased by 5.13% as compared to previous year (2021-22).
- ❖ The meat production from poultry is 4.995 million tonnes, contributing about 51.14% of total meat production. The growth of poultry meat production has increased by 4.52% over previous year.
- ❖ The top 5 meat producing States are Uttar Pradesh (12.20%), West Bengal (11.93%), Maharashtra (11.50%), Andhra Pradesh (11.20%) and Telangana (11.06%). They together contribute 57.90% of total meat production in the country.

2.3 Meat Production

*Based on Projected Human Population according to Population Census-2011

The **Graph 2.17** shows that the total Meat production in the country was at 7.39 Million Tonnes in the year 2016-17 and since then the production of Meat continues to rise over the period. It can be observed in the graph that the Meat production has improved substantially and it reached 9.77 Million Tonnes in

the year 2022-23. The per capita availability was 5.72 kg per annum during the period 2016-17. There has been steady increase in per capita availability of Meat. The per capita availability reached at 7.10 Kg/Annum the year 2022-23, a 0.28-point jump from 6.82 Kg/Annum of the previous year 2021-22.

2.3.1 SPECIES-WISE MEAT CONTRIBUTION

The **Graph 2.18** shows the contribution of meat production from Cattle, Buffalo, Sheep, Goat, Pig and Poultry in the total meat produced across the country during 2022-23. The diagram shows that nearly 51.14% of meat production is contributed by

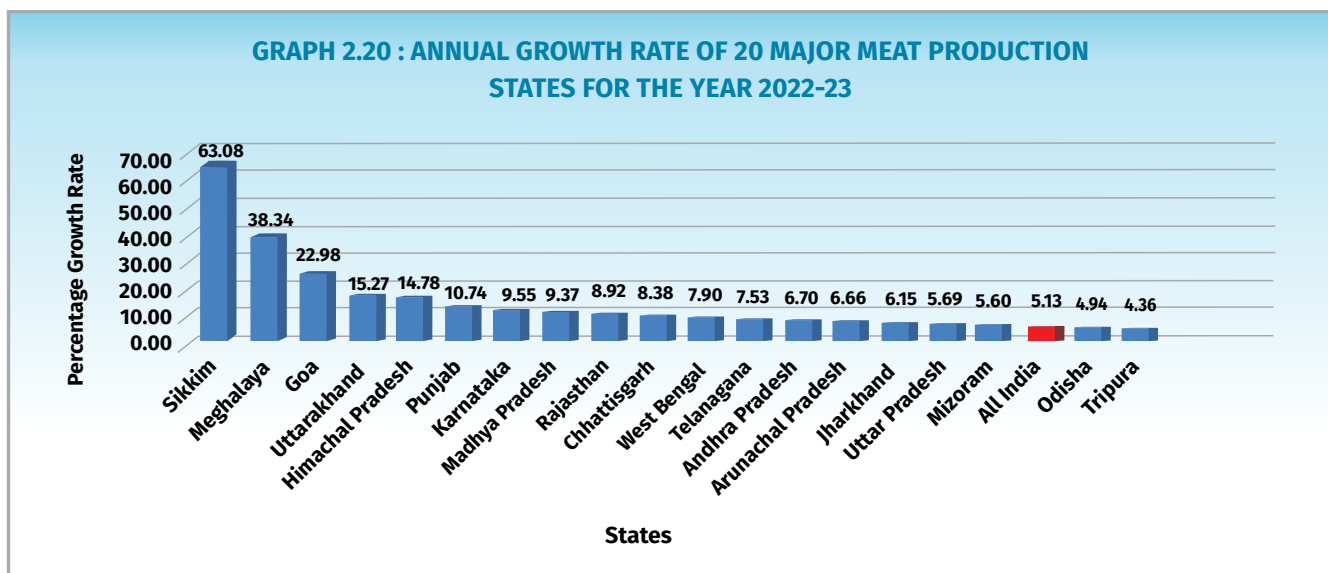

Poultry while Buffalo, Goat, Sheep, Pig, and Cattle contributes nearly 17.61%, 14.47%, 10.51%, 3.85% and 2.43% of meat production respectively to the total meat production of the country.

2.3.2 ANNUAL GROWTH RATE OF MEAT PRODUCTION

The trend in the annual growth rate of meat production is given in the **Graph 2.19**. The annual growth rate for the year 2022-23 is 5.13%.

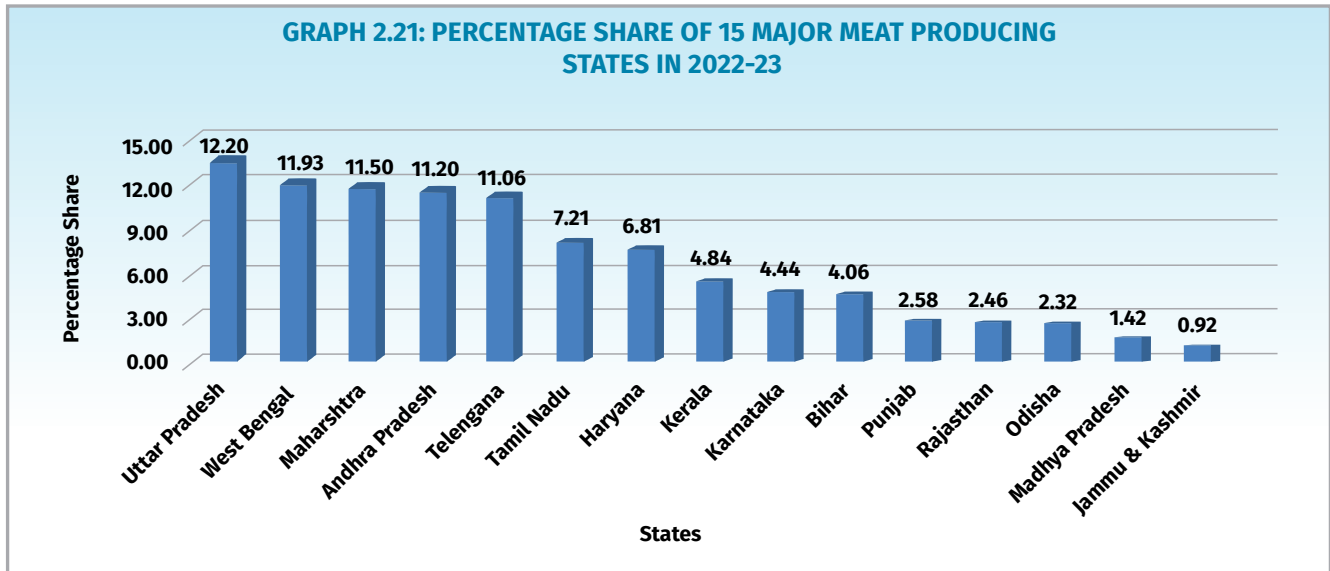

2.3.3 STATE-WISE ANNUAL GROWTH OF MEAT PRODUCTION DURING 2022-23

Graph 2.20 shows that the state-wise variation in the annual growth rate of meat production during 2022-23. This year, the State of Sikkim has registered the highest annual growth rate i.e.,

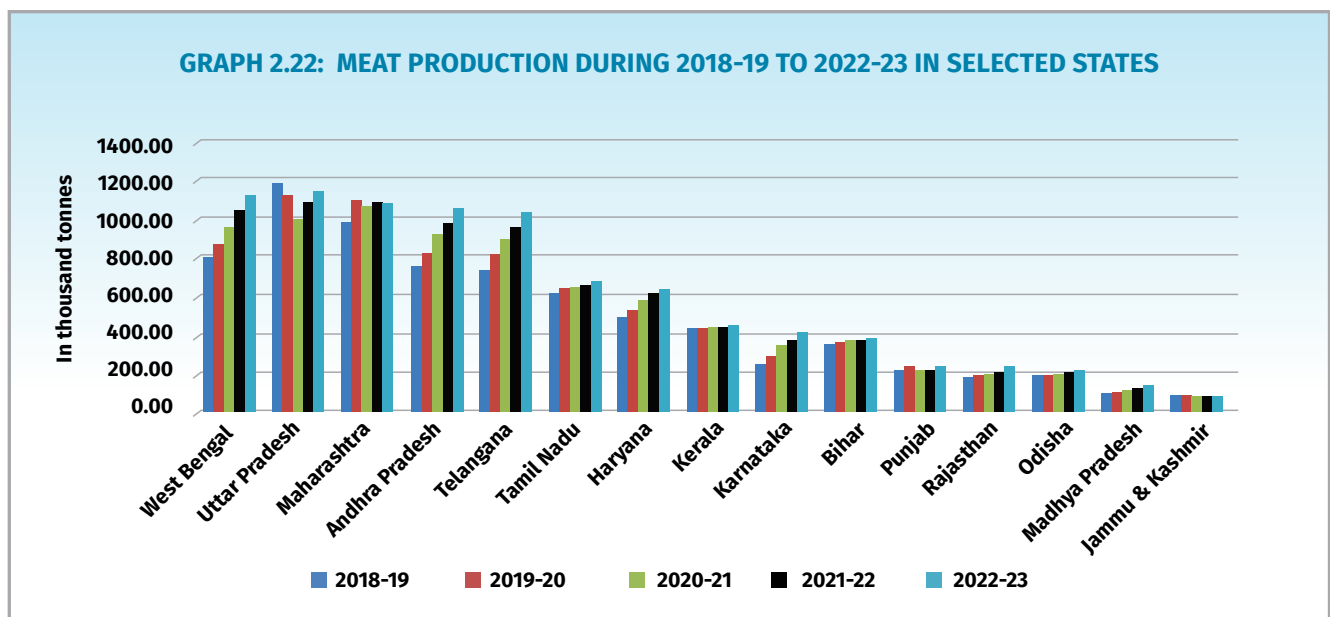

63.08%. The total 17 States have reported growth over the national average growth rate 5.13% during 2022-23.

2.3.4 STATE-WISE SHARE OF MEAT PRODUCTION DURING 2022-23

The state-wise share of meat production vis-a-vis total meat production in the country is given in the **Graph 2.21**. The largest meat producing State is Uttar Pradesh that produces 12.20% of the total meat produced in the country followed

by West Bengal that produces 11.93% of the total meat production. Maharashtra is the third largest meat producing state in the country that produces nearly 11.50% of the total meat production in the country.

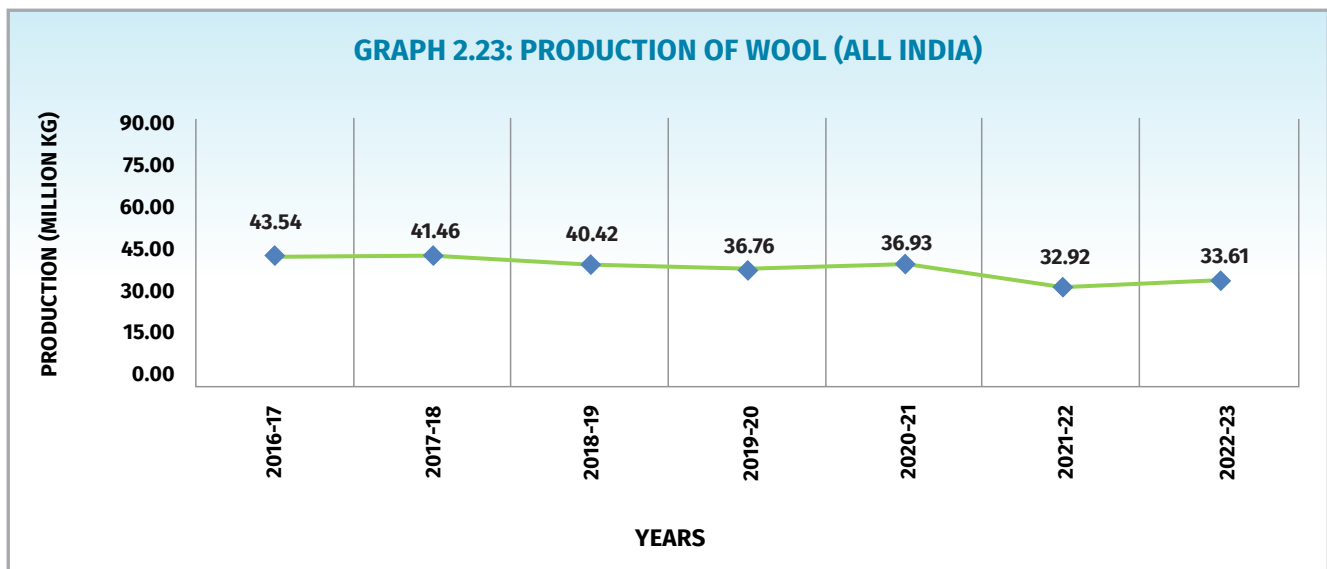

The State-wise analysis showing the trend in meat production over the period 2018-19 to 2022-23 is depicted in the **Graph 2.22** below. During these Five years, most of the states have shown increasing trend in the production of meat.

MAJOR HIGHLIGHTS OF WOOL PRODUCTION

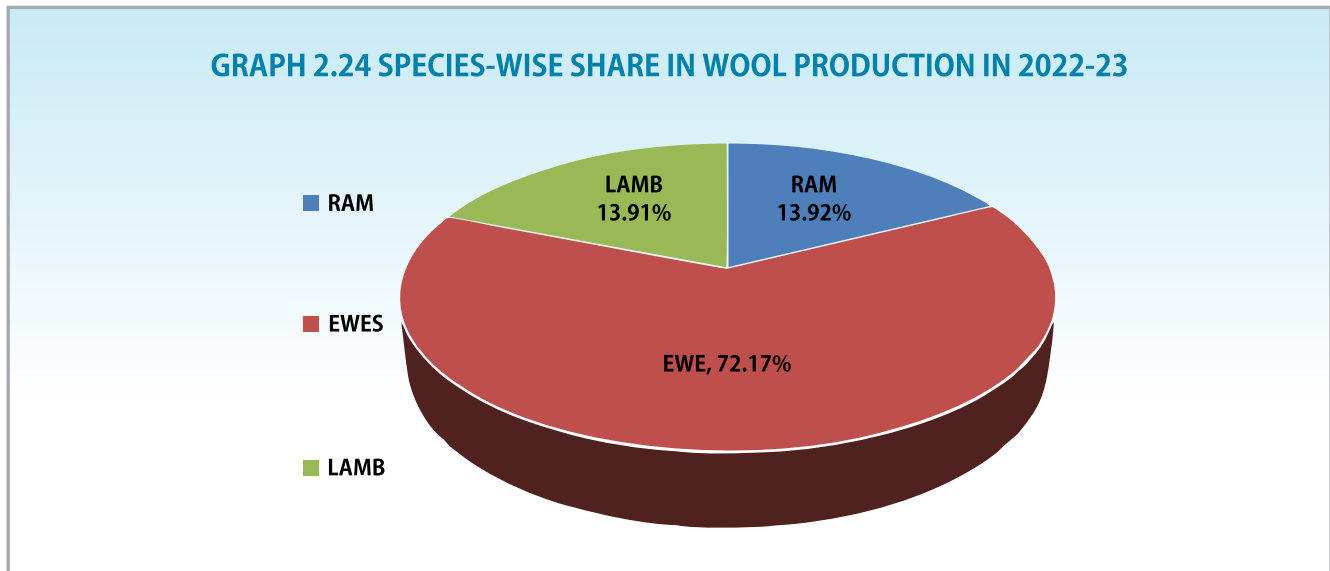

- ❖ The total wool production in the country is 33.61 million Kgs.
- ❖ The Wool production has increased by 2.12% as compared to previous year.
- ❖ The top 5 wool producing States are Rajasthan (47.98%), Jammu & Kashmir (22.55%), Gujarat (6.01%), Maharashtra (4.73%) and Himachal Pradesh (4.27%). They contribute 85.54% of total wool production in the country.

2.4 Wool Production

The total wool production in the country was at 43.54 million kg during 2016-17. As per **Graph 2.23**, The Wool Production has decreased 33.61 million kg during 2022-23. As compared to 2021-22 the wool production has increased by 2.12% during 2022-23.

2.4.1 SPECIES-WISE SHARE OF WOOL PRODUCTION

Graph 2.24, shows the contribution of wool production by Ram/Wether, Ewe and Lamb in the total wool production during the year 2022-23. The analysis shows Ewes contribute 72.17% of the total wool production whereas Ram/Wether and Lamb contributes only 13.92% and 13.91% respectively in

the total wool produced across the country. Due to lesser population as reported for the lamb shorn and Ram/Wether the production of wool from them is comparatively less to the wool produced from the Ewes.

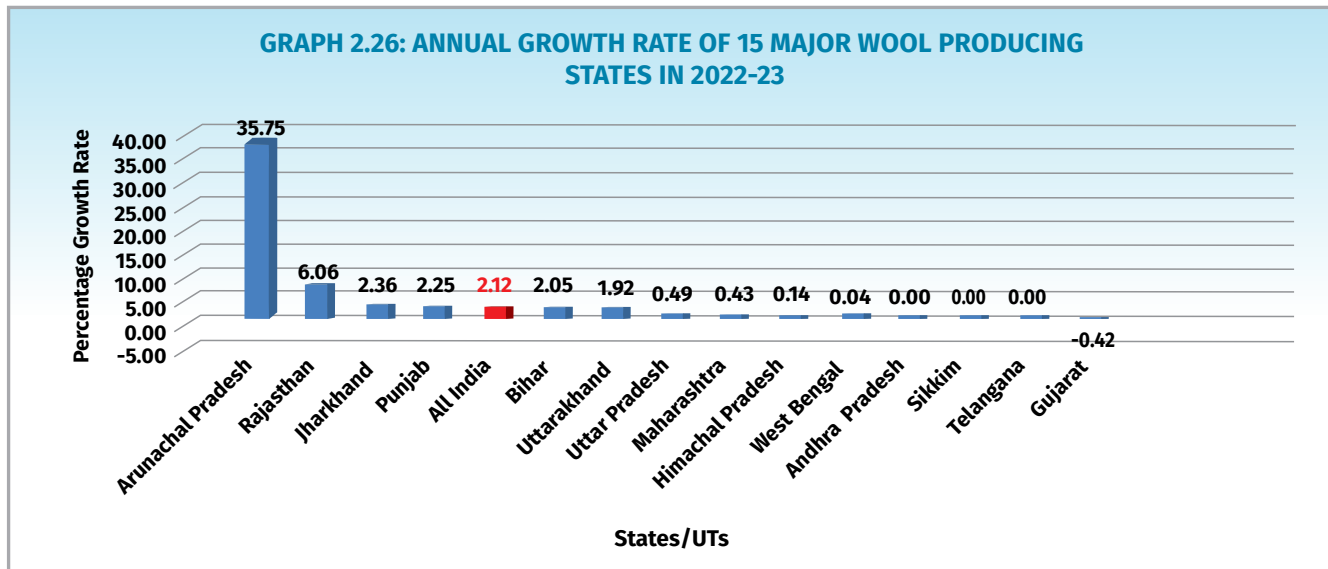

2.4.2 ANNUAL GROWTH RATE OF WOOL PRODUCTION

Graph 2.25 shows the total wool production in the

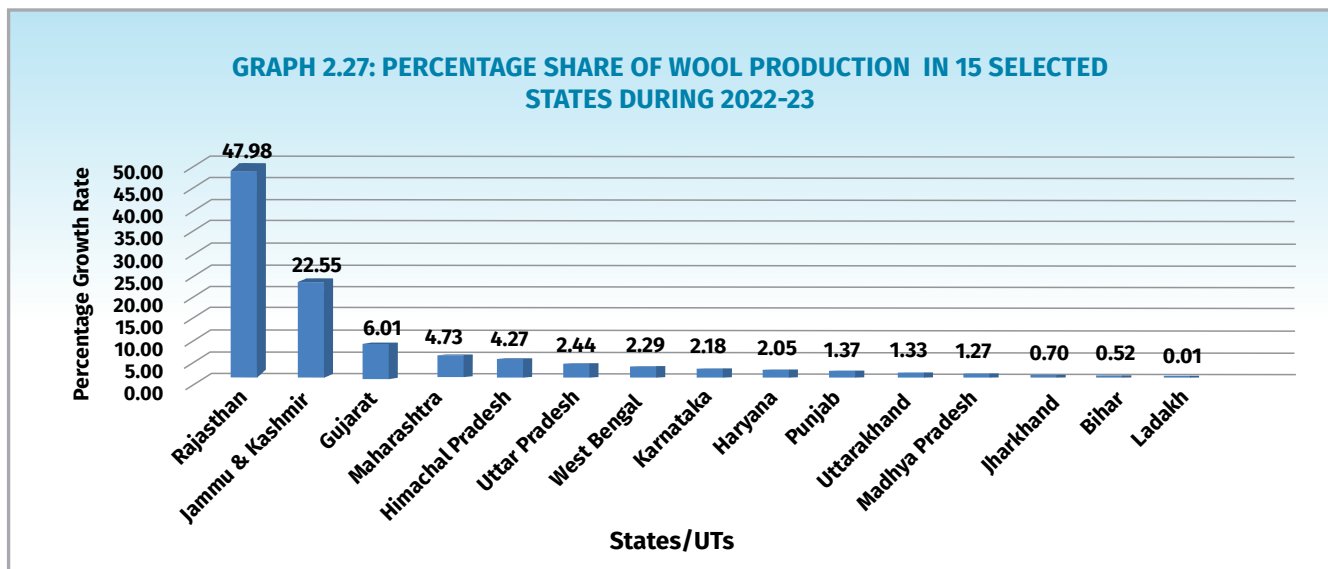

country has positive growth rate 2.12% During the year 2022.23.

2.4.3 STATE-WISE ANNUAL GROWTH OF WOOL PRODUCTION DURING 2022-23

From above **Graph 2.26** it can be seen that by Rajasthan registering a growth of 6.06% and Arunachal Pradesh has the highest annual growth rate among the states which is 35.75% followed Jharkhand with 2.36% in the year 2022-23.

2.4.4 STATE-WISE SHARE OF WOOL PRODUCTION DURING 2022-23

The **Graph 2.27** depicts, percentage share of wool production in selected major wool producing States. Rajasthan is the largest producer of wool in the country that contributes 47.98% of the total wool production followed by Jammu & Kashmir with a share of 22.55%. Gujarat is the third largest wool producer state that has share of 6.01% of the total production in the year 2022-23.

As depicted in above **Graph 2.28** there has been varying trend in the production of wool across various States during the period 2018-19 to 2022-23. Rajasthan is the largest producer of wool throughout the period 2018-19 to 2022-23.

2.5. INFRASTRUCTURE

2.5.1 INFRASTRUCTURE OF ANIMAL HUSBANDRY SECTOR

*Source: From State/UTs

The infrastructure of animal husbandry sector is a key area that support for its accelerated growth.

Graph 2.29, shows there are 22823 Veterinary Dispensaries and 33337 Veterinary Aid Centers, while 13042 Veterinary Hospitals in our country. For an accelerated growth of Livestock sector

strengthening of infrastructure is must.

Artificial insemination is not merely a novel method of bringing about impregnation in females. Instead, it is a powerful tool mostly employed for livestock improvement.

*Source: From State/UTs

Graph 2.30 shows the growth in adoption of this methodology over the years in our country. By adoption of artificial insemination, there would be considerable reduction in both genital and non-genital diseases in the farm stock. It can be observed that the number of artificial inseminations performed in the country has been increased from 77.17 Millions Nos. in 2021-22 to 80.57 Million Nos in 2022-23.

2.6 GROSS VALUE ADDED (GVA)

2.6.1 ITEM-WISE PERCENTAGE CONTRIBUTION IN AGRICULTURE & ALLIED SECTOR (A&AS) AND TOTAL GVA

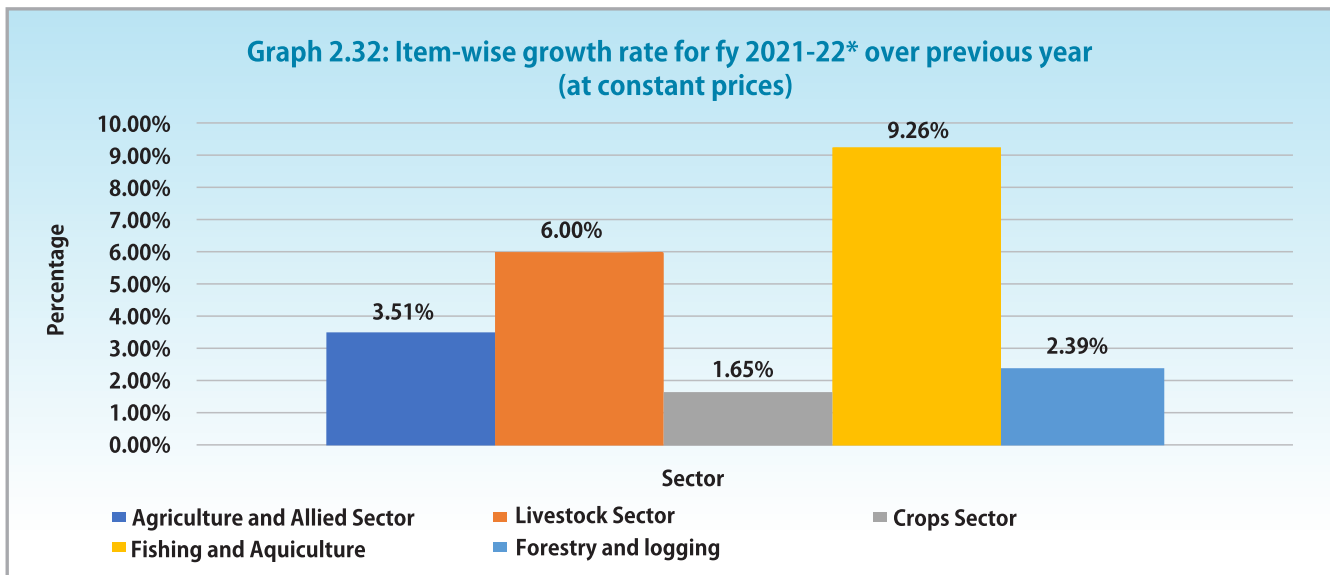

Note: “*” First revised estimates

Source: NAD, CSO, MoSPI

As per the press note on “First Revised Estimates of National Income, Consumption Expenditure and Capital Formation for 2021-22” released by National Statistical Office(NSO), MoSPI on 31st January, 2023 the Gross Value Added (GVA) of livestock sector is about Rs. 12,27,766 crore. At current prices during

FY 2021-22 which is about 30.19% of Agricultural and Allied Sector GVA and 5.73% of total GVA. The Gross Value Added (GVA) of livestock sector (at constant prices) is about Rs. 6,54,937 crore during FY 2021-22 which is about 30.47% of Agricultural and Allied Sector GVA.

Note: ‘*’ First revised estimates
Source: NAD, CSO, MoSPI.

2.6.2 ITEM -WISE ANNUAL GROWTH RATE (AGR)

Livestock, though only half the size of crops, plays a crucial role in driving the agricultural GVA growth. As per the first revised estimates Livestock Sector sees an annual growth rate of 6.00% at constant prices, more than Crop Sector growth rate which is

1.65%. Even the growth rate for Livestock sector is more than the overall growth rate of Agriculture & Allied Sector which is 3.51% which draws a special attention in better performance of Livestock to drive Indian economy.

MILK PRODUCTION

Table 1: Year -wise Estimates of Production and Per Capita Availability of Milk during 1950-51 To 2022-23 -All India

Year (March to February)	Milk Production (Million tonnes)	Human Population (Million nos.)	Per Capita Availability (Gram /day)
1950-51	17.0	359	130
1955-56	19.0	393	132
1960-61	20.0	434	126
1968-69	21.2	518	112
1973-74	23.2	580	110
1979-80	30.4	664	125
1980-81	31.6	679	128
1981-82	34.3	692	136
1982-83	35.8	708	139
1983-84	38.8	723	147
1984-85	41.5	739	154
1985-86	44.0	755	160
1986-87	46.1	771	164
1987-88	46.7	788	162
1988-89	48.4	805	165
1989-90	51.4	822	171
1990-91	53.9	839	176
1991-92	55.7	856	178
1992-93	58.0	872	182
1993-94	60.6	892	186
1994-95	63.8	910	192
1995-96	66.2	928	195
1996-97	69.1	946	200
1997-98	72.1	964	205
1998-99	75.4	983	210
1999-2000	78.3	1001	214
